LRP Power Pack 3300 - 7.2V - 6-cell NiMH Stickpack

The next power generation!

Art. no.: 71120

With the new LRP stickpacks a completely new and updated budget line will be available. The new power packs represents the next generation of powerful NiMH stickpacks featuring higher capacity, outstanding power delivery, lower internal resistance and a completely new and stylish design.
The packs can be used in all R/ C racing applications.

Another special feature of the new Power Packs and Hyper Packs is the new package design. Each box contains 12 single stickpacks and can easily and quickly be converted into a great sales display box for better attention in every store directly at the point of sale.

On the technical side the new stickpacks have been improved to the max regarding the following areas:
- Higher cycle capability
- Improved quality
- Higher voltage.

All battery packs are supplied pre- assembled and ready- to- use including connectors. Only single- cell shrink wrapped cells by LRP are used in each LRP stickpack. Each cell has passed quality control and durability tests before it becomes a LRP stickpack.

Only high- quality LRP cells are used in LRP stickpacks – just BLUE IS BETTER!

Features

- Higher cycle capability
